

The Complete "Service Provider" for
Heating, Ventilation and Air Conditioning

Weatherite

SERVICE & MAINTENANCE LIMITED

Welcome to Weatherite Service & Maintenance, Leaders in HVAC equipment installation, servicing, maintenance, repair & replacement.

Established in 1972, Weatherite Service & Maintenance Ltd specialise in the installation and service and maintenance of all aspects of air conditioning, heating and ventilation systems.

Our reputation for offering the complete service has helped us become one of the UK's leading service & maintenance companies, with a proven track record and an impressive customer base to match.

As part of the Weatherite Group, we have the support and back up few of our competitors can match in today's highly competitive, fast-track HVAC services environment - delivering a total commitment to excellent customer service and satisfaction.

- **Nationwide network of highly trained, skilled, engineers providing a 'local' rapid response capability.**
- **Preventative and re-active maintenance programmes to suit each individual customer.**
- **Emergency call-out service - 24/7.**
- **Complete design, installation and commissioning of new, refurbished or replacement systems.**
- **Full ISO:9001 and ISO:14001 Accreditation.**
- **Member of REFCOM, CONSTRUCTIONLINE, CHAS and Safe Contractor.**

Our Expertise in Air Conditioning

Ensuring efficient operation of your air conditioning equipment can help save a tremendous amount on energy costs as well as prolonging the life of your equipment.

Ensuring a healthy, safe working environment is also of prime importance for staff well being.

As you would expect, with 40 years experience in the field, we can install, service & maintain virtually any type of commercial air conditioning system, across a broad spectrum of applications from a small comfort cooling installation to a multi-application VRF arrangement or multi site-chiller replacement/inspection programme.

All our engineers are fully trained and conversant in all aspects of Health and Safety and Construction Design Management (CDM) regulations as well as being Safe Contractor approved and will ensure your equipment is operating at optimum efficiency.

As an organisation, we are conscious about energy efficiency and sustainability which is why we incorporate the latest energy saving technology in all the solutions we offer.

So, if it's an air conditioning requirement - call the experts, Weatherite Service & Maintenance.

Our Expertise in Heating

Like all mechanical and electrical equipment, heating and hot water systems need looking after.

Regular servicing and maintenance will help prolong the life of the equipment and maximise the overall performance through its lifecycle. Weatherite Service & Maintenance has a wealth of expertise covering every aspect of commercial heating and boiler installation and servicing and all our engineers are fully trained, equipped and competent. They have a high level of practical and diagnostic experience, so you can be assured your systems will be running- and continue to run- at optimum performance.

Tailored service plans can be designed to fit within your particular budget, spreading the cost over the coming years.

- **All types of heating systems catered for including high efficiency boiler applications.**
- **Air source heat pumps absorb heat from the outside air and this heat can then be used to warm water for radiators, for under floor heating systems, warm air convectors and hot water. Ground source heat pumps operate in a very similar manner but use the earth's heat to deliver the same solution. As you would expect, we offer a complete service for these type of installations.**
- **We have the knowledge and expertise to service & maintain virtually any type of boiler including the latest 'green bio-mass' energy efficient systems.**
- **The need for compliance in line with current legislation on all aspects of the Gas Safe register, health & safety and efficiency of performance are number one priorities in all aspects of work undertaken by our trained engineers.**
- **Solar powered heating systems, used either as a supplementary or primary heat source, are a viable alternative for many modern buildings. We can advise on the options available and how to achieve optimum results.**

Our Expertise in Ventilation

Efficient air flow is paramount for a healthy working environment and the latest regulations concerning indoor air quality and fire prevention are aimed at tightening the parameters of ventilation systems to ensure leakages are minimised, air quality improved and energy efficiency increased.

At Weatherite Service & Maintenance, we offer full installation, repairs, replacement and cleaning expertise in all areas of ductwork and ventilation systems.

Our services also include; design, sourcing and installation of all ductwork, engineering support, technical advice, selection and installation of ventilation equipment, ventilation system design and COSHH testing and certification.

As a modern and progressive company we pride ourselves on keeping pace with the latest technology advancements and actively encourage the continued professional development of our staff through training in new equipment and techniques.

- **Weatherite Service & Maintenance can offer full inspection, servicing and cleaning and advise on all aspects of ventilation to ensure any specified ventilation system complies with all the current legislation and delivers the correct air change rate and filtration quality.**

Our Expertise- in a wide range of Sectors

With over 40 years' experience in the industry, we currently install, replace, service and maintain a wide range of HVAC systems within a wide range of buildings including small IT server rooms, high dependency hospital operating theatre's, school classrooms, university lecture rooms, multi-site retail outlets and large commercial/office spaces - to name but a few.

The main sectors we operate within include; Retail, Commercial, Healthcare, Education, Hospitality, Leisure, IT Critical/Data Centres and the Public Sector.

With our level of expertise, we can work closely with the end user and/or their FM support teams to ensure we deliver exactly the right solution, completed on time, to the client' total satisfaction – and within budget.

Our Expertise in Servicing

- Whatever your requirement, we are happy to undertake servicing activity for any type of HVAC equipment.
- We always respond quickly, whether it's a breakdown of an individual component or a full system failure.
- Our local, fully trained and experienced engineers will also train in-house staff, where appropriate.
- We operate under strict Health & Safety legislation and are proud of our safety record.
- We undertake commissioning / decommissioning of refrigeration plant and our engineers are registered for safe handling of refrigerants.
- We specialise in the replacement of existing, worn out equipment with new, energy efficient systems, providing better performance and shorter pay back periods.
- Complete cleaning of systems, air flow balancing, filtration changing, etc.
- Comprehensive Spare Parts Centre - stocking Weatherite and major HVAC branded products.

Our Expertise in Maintenance

Weatherite Service & Maintenance offers a comprehensive range of maintenance contracts from inspection through to all encompassing programmes that include call out, all parts, consumables and labour charges. We can tailor a programme to suit our customers' exact requirements.

The result will be a plant that operates to design specification and is fully able to meet the demands required, with little disruption.

- **Nationwide network of fully trained service technicians, ensuring the provision and delivery of a quality service - every time.**
- **Planned preventative maintenance programmes available.**
- **Fast, efficient reactive maintenance services.**
- **Call 0121 543 5800 for more details.**

Our Expertise in 24 Hour Re-Active Emergency Service Provision

The unpredictable is, unfortunately, one of life's certainties. That's why we consider our nationwide rapid response service an essential part of our after-sales care.

Weatherite Service & Maintenance is always on call, 365 days a year, 24 hours a day, so our customers can always call us and receive a speedy and efficient emergency service, anywhere within the UK.

We realise the impact on our customers' business when equipment breaks down and this is why we offer a comprehensive 24 hour emergency service staffed by a team of specialist engineers.

Weatherite Service & Maintenance also provide a Technical Helpdesk (0121 543 5800), ready to take customer calls.

- **Regional and National rapid response teams, aimed at minimising plant downtime.**
- **Delivering UK-wide service and maintenance along with complete management and reporting activity.**
- **365 days a year, 24 hours a day.**
- **One number 'National Call Line' for contract customers, straight through to a Duty Engineer 0121 543 5800.**
- **Technical Helpdesk ready to take your call (during normal working hours).**

A Question of Quality, Service and Health & Safety

Weatherite Service & Maintenance Ltd is totally committed to delivering the highest levels of Quality, Service and Health & Safety in every aspect of our work.

We are an ISO 9001 Quality Accredited company. We are also an ISO 14001 Environmental Management Accredited company, affirming our commitment and responsibility in developing and implementing an effective environmental management system.

And, because our business offering is primarily service based, we realise how important it is to deliver the highest standards at all times. That's why all our engineers are highly trained, conscientious professionals who understand the importance of working efficiently and safely at all times.

Our engineers are fully conversant with all relevant Health & Safety regulations as well as being Gas Safe and REFCOM registered.

We are also CHAS and Constructionline Accredited.

With 45 years expertise, Weatherite Service & Maintenance is part of the Weatherite Group, one of the UK's leading HVAC organisations.
